PROFESSIONAL SUMMARY

Full Stack Developer with 9 months of internship experience at two companies, working on live client products (React, Node.js, MongoDB, PostgreSQL). Launched two live apps: CodeGecko, a pull request reviewer powered by Gemini and RAG, and LinkUp, a Socket.IO chat app.

WORK EXPERIENCE

Django Softwares Private Limited — Full Stack Developer Intern **Jan 2026 – Jun 2026**

- Shipped 12+ full-stack features on the MERN stack across 2 live client modules, from API design to production deployment.
- Developed 15+ REST API endpoints (OAuth authentication, session management, product workflows, page operations) and reusable React components, reducing duplicate UI code.
- Optimized 2 frequently used endpoints by refining MongoDB queries, adding indexes, and caching in Redis.

Crystaltech Services Pvt. Ltd. — Web Developer Intern **May 2025 – Jul 2025**

- Delivered 3 client projects with Node.js, Express.js and React, from spec to staging, and defined API contracts (request schemas, validation rules, error codes) for 2 modules.
- Rewrote unindexed joins and added composite indexes to improve query performance on a PostgreSQL table.

TECHNICAL SKILLS

Languages & Fundamentals: JavaScript (ES6+), TypeScript, C++, Python, Data Structures & Algorithms, OOP
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend & APIs: Node.js, Express.js, REST APIs, JWT, OAuth 2.0, Socket.IO
Databases & ORM: MongoDB, PostgreSQL, MySQL, Redis, Prisma ORM, Pinecone (Vector DB)
AI & LLM: Gemini API, RAG, Claude, Cursor, GitHub Copilot, ChatGPT
DevOps & Tools: Docker, Git/GitHub, GitHub Actions, Postman

PROJECTS

CodeGecko — AI Code Review Platform Live: coderabbit-flame.vercel.app

Next.js 16, TypeScript, Prisma, PostgreSQL, Inngest, Pinecone, Gemini 2.5 Flash, Better Auth

- Built an AI code-review platform that automatically reviews GitHub pull requests: GitHub OAuth, one-click webhook setup via Octokit, and reviews posted back as PR comments, fully event-driven with no polling.
- Integrated RAG for context-aware reviews: embedded repository files into Pinecone in batched upserts on repo connect and retrieved the top-5 relevant files per PR to ground each review.
- Designed a PostgreSQL schema with Prisma migrations and a freemium usage model (free-tier repo and review limits) with Polar checkout (sandbox), plus a Recharts analytics dashboard.

LinkUp — Real-Time Chat Application Live: linkup-live-chat-application.onrender.com

React.js, TypeScript, Node.js, Express.js, MongoDB, Socket.IO

- Created bidirectional real-time messaging with Socket.IO: message delivery, typing indicators and read receipts pushed over persistent connections instead of polling.
- Tracked active socket IDs per room to manage the connection lifecycle, handling reconnects without duplicate event registration or state leaks; persisted messages to MongoDB indexed by room and timestamp.

AuthEngine — Authentication Backend GitHub: github.com/Amardeep-Chouhan/Auth-Engine

Node.js, Express.js, MongoDB, JWT

- Implemented an authentication backend with 7 REST endpoints: registration, email OTP verification, JWT access/refresh tokens, session management, and multi-device logout.
- Hardened auth flows with 10-minute OTP expiry (MongoDB TTL cleanup), 5-attempt/10-minute OTP rate limiting, SHA-256 hashing, refresh-token rotation and HTTP-only cookies; sent OTP emails via Gmail OAuth2.

EDUCATION

Madhav Institute of Technology & Science (MITS), Gwalior, MP **2022 – 2026**

B.Tech in Information Technology (IoT) | CGPA: 7.55 / 10

LEADERSHIP & ACTIVITIES

- Organized a 14-hour hackathon for 180 participants across 30 teams, leading a 6-person committee to design problem statements across 4 domains.

CERTIFICATIONS

AWS Certified Cloud Practitioner (2025) | HackerRank Software Engineer Intern Certificate (2026) | HackerRank SQL 4-Star
